Subject: EPA COMMENTS ON 404 PERMIT

The Army Corps of Engineers December 23, 2014 Evaluation of Permit Application SWG-2012-01017 states that the EPA commented. The data submitted to the EPA, was based on my objective scientific analysis "fatally flawed" as stated in the EA thus negating the comments of the EPA to comments on bogus data submitted to the Corps to "fraudulently" in my opinion obtain a permit on a highly destructive and costly project that would destroy old growth riparian urban forests, cause increased siltation via clearcutting of the ancient trees and channeling a natural stream course and destroying 10,000 years of Native American and Anglo-Pioneer archaeological evidence. I would like the EPA reviewer of this project to please call me and better yet come for a visit to see personally the evidence of what I consider to be FEMA FRAUD.
